

August 2006

Dear John

I am writing to express our thanks to you, for your recent help in helping us to acquire not only certification but also an awareness to Power Boating itself.

Your first session with us proved to be more valuable than we could have imagined.

On our own boat you spent five hours checking its overall condition, safety equipment and training us both in general boating skills, this combined with two hours at sea showing us how to handle the boat and how to look at sea conditions that would effect any planned trips. We were very impressed and so immediately booked the RYA level 2 course with you.

The following day we followed the good practice that you recommended ie: Tides, Weather etc and planned our little trip along the coast to Keyhaven. To our surprise and the Met Office a storm blew up half an hour into our trip rain, thunder/lightning hail and VERY ROUGH SEAS. But by not panicking and employing all the advice given to us the previous day we managed to get back to harbour very wet but safe. Later that day we had heard of other boats that had been beached or had to be assisted by the RNLI .

Several weeks later we spent Two interesting and enjoyable days with you gaining further knowledge and expanding our capabilities.

Having been on numerous courses and seminars I would like to commend your communication and training skills and would recommend your services to anybody taking up boating.

Thank you again for your time and patience and look forward to participating on other courses with you.

Kind Regards

Dave Price
